## Double-Wall Stovepipe Systems

DVL double-wall stovepipe completes the venting system when used with one of DuraVent's chimney products, such as DuraTech, DuraTech Canada, DuraPlus, or DuraTech Premium.

### DVL

DVL's double-wall, air-insulated design reduces clearances to combustibles from 18" to 6", the closest clearance to a wall of any connector pipe. DVL improves stove performance by maintaining high flue gas temperatures for a strong, steady draft. Because the inner wall is stainless steel the flue heats up faster, stays hot longer, minimizes the formation of creosote, and has the same life expectancy as the chimney. Adjustable lengths eliminate the need for cutting or crimping.

Required for Manufactured Home installations. See appliance manufacturer's installation instructions.

### DVL Decreaser

Use to decrease the appliance outlet only when approved by the appliance manufacturer or authority having jurisdiction.

**\*IMPORTANT:** The diameter of the stovepipe (connector) and chimney should match the outlet size on the appliance. Decreasing chimney diameter even 1" can affect draft and have serious negative impact of chimney performance. Please check the stove manufacturer's venting instructions closely prior to installing a DECREASER. Be careful to use these components only when appropriate.

### DVL Adapter for Recessed Stove Collar

This adapter is similar to our current DVL adapter but has a longer inner sleeve and an additional wrapping outer sleeve. Longer inner sleeve enables adapter to be used on short stove collars as well as on stove collars with nearby interfering features, like a convection deck. Wrapping outer sleeve conceals coupling between stove and adapter, and enables user to install on stoves with collars up to 4 inches tall.
